EDUCATION

CLASS 10
S.D Public School
2016 - 2017   CGPA-7.4

CLASS 12
S.D Public School
2018 - 2019   Percentage-89%

B.E. CSE
Chitkara University,HP
2019 - 2023   CGPA-9.74

WORK EXPERIENCE

Trainee Software Engineer
GeekyAnts
05/2022 - 07/2023   Bangalore

Tasks

- Contributed actively to the Native Base project, an open-source framework for building cross-platform mobile applications.
- Maintained and updated existing software applications, fixing bugs and enhancing functionality based on user feedback and requirements.
- Collaborating with senior engineers and developers to assist in the design, coding, testing, and debugging of software applications or modules.
- **Tech used : Javascript | React | React-Native | Node | GraphQL | Hasura.**

Software Engineer -1
GeekyAnts
07/2023 - Present   Bangalore

Tasks

- Actively contributed to the development of a project from scratch using technologies like react-native,react and node.
- Successfully refactored and optimized the codebase of a challenging software project, enhancing the user experience and demonstrating strong analytical and problem-solving skills.
- collaborated with the backend team to integrate frontend components with server-side APIs, ensuring seamless data flow and real-time updates.
- **Tech Used: Javascript | React | React-Native | Node .**

TECHNICAL AND COMPUTER SKILLS

Node.Js   Next.js   JavaScript   React
Express   SQL   React-Native   GraphQL
Hasura   Typescript   MongoDB   Laravel

PROJECTS

Academy Portal Project
- **Technologies:- Laravel | Next.js | Express | Node.js.**
- it's internal project,created an application , the frontend development involved creating a user-friendly and responsive interface using Next.js.
- Implemented Google Authentication and login system. Integrated GraphQL endpoints into Laravel projects, enabling efficient and flexible querying of data.
- Implemented user authentication and authorization using libraries such as JWT in Express.js
- Used TypeScript to build scalable and maintainable server-side applications.
- implemented Storybook in react native app.

PayPenny Project
- **Technologies:- React-Native | Node.js | TypeScript .**
- It's a client Project , mobile application to transfer money specified country 4 supported countries Canada ,UK , Australia (Money first) and EU to India without transfer fees.
- Implemented microservices architecture in paypenny project and Implemented integrated API's.
- Using TypeScript with React Native to build scalable and maintainable mobile applications.
- Writing strongly-typed code using TypeScript interfaces, classes, and types for better code reliability and maintainability.
- Implemented real-time updates and communication using libraries such as RTK (Redux Toolkit) in React.
- Utilized React Router for handling routing and navigation within the application . Utilized React Native for building scalable and maintainable mobile applications
